

national science week

9-17 August 2025

Media Release [sample only]

Date: 8 August 2025

Fingerprinting forensics, looking for glow worms, and astronomical light shows

Explore caves of glowing creatures at night, learn about the science of the southern lights, knit your own neuron, and literally try your hand at forensically fighting crime. It's all part of the Springfield Science Festival—north-west Tassie's celebration of National Science Week.

"The festival is a great opportunity for the community to get involved in science and meet local researchers" says Maggie Simpson, festival coordinator and local science teacher.

"There will be events for all ages—from forensic fingerprinting and Neural Knitworks workshops, to night tours visiting the glow worms in the Gunns Plains Caves, and talks with scientists about the science behind the Aurora Australis and why Tasmania is a great place to see it."

The Springfield Science Festival will run from August 9 to 11 at the Springfield Civic Centre. To see the program and book tickets, see www.website.com.au.

National Science Week is Australia's annual opportunity to meet scientists, discuss the hot topics, do science and celebrate its cultural and economic impact on society.

First held in 1997, National Science Week has become one of Australia's largest festivals. Last year about 3.4 million people participated in 1,983 events and activities.

In 2025, National Science Week events will be held online and right throughout Australia — from star gazing across the country to exploring meteorite craters in the 'Red Centre'; joining a 'dark matter' road trip from East to West or 'dark skies' project in Tassie; solving eco crimes in a Melbourne shipping container-turned lab or answering the nation-wide call for 'Space farmers wanted!'—plus science festivals, music and comedy shows, expert panel discussions, interactive displays, open days and online activities.

The festival is proudly supported by the Australian Government; partners CSIRO, the Australian Science Teachers Association and ABC Science.

National Science Week 2025 will run from 9-17 August. Event details can be found at www.scienceweek.net.au.
